## FULL STACK DEVELOPER

### CAREER OBJECTIVE

Full stack developer with a passion for building clean, user-friendly, and functional web applications. From the moment I wrote my first hello world with JAVA, I've been obsessed with coding. I'm excited to bring that passion to a full-time career.

I am a focused and smart developer with an AEC degree from John Abbott College with some experience in Java, JavaScript, SQL, CSS, and most front-end and back-end languages to create and implement web applications.

I enjoy being challenged and engaging with projects that require me to work outside my comfort and knowledge set, continuing to learn new designing techniques, languages and development techniques are important to me.

### Education

- JOHN ABBOTT COLLEGE 2021-2022

AEC Full Stack development

- BAHONAR UNIVERSITY 2007

Bachelor's in chemical engineering

### Projects & Skills

HTML/CSS /JavaScript

- Created a company website for a fictitious microbrewery.
- Used Bootstrap to create responsive web pages.
- Created a series of games such as whack a mole.

Java & spring boot

- Created a multiplayer game.
- Focused heavily on object-oriented programming.
- Created a university management web application with spring boot and SQL.
- Created a simple railway ticket system with spring boot and SQL

#### Laravel & PHP

- Created a functional fictitious Bank which allowed clients to receive and send money to other clients.

#### Cloud Administrator

- Used AWS to put projects online and used various types of security measures to avoid malicious exploits.
- Deployed a Bank Web application on AWS.
- Learned how to use Docker.

#### React

- Created a Flash Cards web application that allows users to create customized decks of cards and review cards in study mode or test mode. I used MongoDB for the database.
- Learned how to implement MERN Stack (MongoDB, React, Node, Express).

#### C# & .net Framework

- Created several project.

#### ASP. net

## Experience

I have 15 years of work experience, mostly as a sales manager and it gives me some good skills like managing and leading a team, understanding customer's needs, solving problems, and working well under pressure, and to tight deadlines.

During my education in the full stack development program, I gained good experience in coding with different front-end and back-end languages and, I have implemented several web applications as a team member that gives me good experience in agile and scrum.
